

# HVAC System Fact Sheet for Small Businesses and Public Facilities

**HVAC equipment** in restaurants, retail stores and offices accounts for up to 40% of the facility's energy use.

## Opportunities for Small Businesses and Facilities

Is an HVAC project right for you?

- Is your current HVAC unit more than seven years old?
- Has it been three or more years since there was a coil cleaning completed on your rooftop unit?
- Do you have to manually change your thermostat temperature on a daily basis?
- Do you notice any uncomfortable working conditions (too hot or too cold) in your facility?

If you answered 'yes' to one or more of these questions, schedule a **FREE energy assessment** today and ComEd can help you upgrade your existing HVAC system, which can help you save money and energy.

## Benefits

Want to improve the performance of your HVAC (Heating, Ventilation and Air Conditioning) system, but not sure where to start? A ComEd Energy Efficiency Program Service Provider will assist you every step of the way to help your facility optimize its energy use.

Consider these energy-efficient opportunities:

- **Programmable or Smart Thermostats.** Automatically control airflow and help lower energy bills.
- **Rooftop Unit Replacement.** Old units lead to high energy and maintenance costs. A new unit can greatly improve energy efficiency.
- **Refrigerant Charge and Coil Cleaning.** Extends the life of your current compressor, increases airflow and reduces energy use.
- **Economizer.** Replace or repair your current economizer to supply your facility with as much outdoor air as possible for "free cooling."
- **Advanced Controls.** Get real-time response to ventilation needs and reduce energy use.
