

**Refrigeration accounts for as much as 40% of energy use in supermarkets, grocery stores, convenience stores, restaurants and retail locations.**

# Refrigeration

## Opportunities for Small Businesses

### **BENEFITS**

Improving the performance of your refrigeration system can help you save money and energy. A ComEd Energy Efficiency Program Service Provider will assist you every step of the way to help your business optimize its energy use.

Consider these energy-efficient opportunities:

» **Evaporator Fan Motors**

Electronically commutated (EC) or Q-sync motors reduce energy use and improve cooler/freezer performance.

» **Anti-Sweat Heater Controls**

Humidity-sensing controls ensure heaters run only when necessary, reducing energy use and costs.

» **LED Refrigerated Display Case Lighting**

LED lighting performs better than fluorescent lighting in cold temperatures, using up to 50% less energy and emitting less heat.

» **Evaporator Fan Controls**

Control the flow of refrigerant and reduce the fan speed as needed, lowering energy consumption.

# Save money on your facility's energy costs. Schedule a **FREE** energy assessment today!

## IS A REFRIGERATION PROJECT RIGHT FOR YOU?

- » Are your cooler and/or freezer doors warm all year round?
- » Are your existing refrigeration motors more than six years old?
- » Are your freezers and/or coolers missing strip curtains and door closers?
- » Do your freezers and/or coolers still utilize fluorescent lighting?

If you answered 'yes' to one or more of these questions, schedule a **FREE** energy assessment today and ComEd can help you upgrade your existing refrigeration system, which can help you save money and energy.
